ZFx86 Mean Time To Failure and Failures In Time Specifications

The ZFx86's Mean Time To Failure (MTTF) and Failures In Time[1] (FIT) specifications are as follows.

Parameter	ZFx86
Technology	CMOS 8
Dynamic Op Life Temperature	125° C
Dynamic Op Life Voltage	3.2V
Typical Use Temperature and Voltage	60°C; 2.5V
Mean Time To Failure	21,129,173.19 hours

1.Failures per billion operating device-hours
